

Government M5S-PD; Zingaretti accepts Conte I Dem will be partners on equal terms?

The national secretary of the Democratic Party, **Nicola Zingaretti** has referred to the Head of State, **Sergio Mattarella** of having accepted the proposal of the Movement 5 Stars in going to the formation of the new Government with the resignation, from the previous 5S-Lega, **Giuseppe Conte**. It is time, he says, for the Democratic Party to overcome the season of hatred, to face new challenges, therefore, Environment, Work, Research and the Good of this Country. A new Government that will not stop after a few months and for this it will have to think in order to start by overcoming the model of the "contract", like that, of one year and a half between pentastars and leghists arriving at an agreement that can lead to realizing the points indicated. At this point, it goes, it should go, towards the appointment of Conte and therefore the discussion on the Ministries - in terms of operational places and it is for this decisive the attribution of those of "weight" -, and here it will be clear, it will be seen, if the PD will be a component on equal terms of the Government or a little more of a partner-azionista of minority with the fear of someone who can risk being a "stampella". The Member of the European Parliament, **Carlo Calenda**, announces his departure from the PD. Malumori seem to be there, especially in the so-called "base", of both forces. To see, if this new majority will go forward alone or if it will "enrich" itself with other parties or will be supported from the outside.
